Serving as an office groups single labeling machine, any user can simply remove this machine from the sleek charger base and take it to their labeling site, wherever it might be at an office desk or in the field.

Or simply use this labeler while connected to a workgroup PC, in a common work area to create professional looking labels. This single machine can be used by asset managers needing to label companies assets wherever they are in the office, or by an administrative assistant who needs to create labels for a file folder, presentation or a visitor name badge. Simply place the labeler back on the cradle to recharge the battery and make it available for the next user. This model features easyswap tape cassettes, one key operation via an easy to use keyboard, bar code templates, and the ability to connect via a USB to a PC for more detailed labeling. This machines easy view graphic display and print preview capability allows users to create and preview label layouts before printing. Amazon calculates a product's star ratings based on a machine learned model instead of a raw data average. The model takes into account factors including the age of a rating, whether the ratings are from verified purchasers, and factors that establish reviewer trustworthiness. Please try again later. Im not easily impressed, but this unit is incredible. Super easy to use, dozens of tape widths and colors no, they are not cheap, but they are excellent quality and can change from one to the other and back again in seconds. I used them to organize my shop, using different colors for stainless steel screws, brass, steel, etc. It works fine as a standalone unit, but you are limited on fonts. When you have what you want, it prints it exactly as shown. By laying it out on the screen you have the option of printing a dozen labels in one printing, all attached together, and cut them manually apart. Tape is easy to peel split back, and adheres great. Unit can be charged with the cradle, or plugged into the cord. Not sure if USB charges it or not. Ive used several labeling units at work, but this is the best Ive ever seen. Did I need it, NO. Did I want it, YES and for the price I had to.

I read previous reviews that the software is difficult to use, but it was very easy. Just select text or picture and simple as that. You can add any image you like even if its from your camera, but it will be shrunk down to fit the label. Very pleased with my purchase. Very easy to set up and I love that it will hold a charge for a very long time and doesnt HAVE to reside in the charging base. I use my unit primarily in the kitchen and home office and mine had to be a compact size suitable to store in a kitchen drawer, placing it in the charger only when necessary. This is a very good size although not

as small as the previous PT80 but I was willing to pay the extra money and add the additional bulk to get away from the unit that sucked up batteries after nearly every label. Take a tip from me about this item; watch the price. Amazon prices will vary hugely in a short period of time. Just keep watching for it to fall to an acceptable point. The problem is, if you have to sit down and fire up your PC and the software no matter how intuitive and sexy, its just easier to use a pen, or nothing at all for that matter. I highly recommend that you check out Brothers website; they have a nifty comparison feature that you can customize per model and feature and produce a PDF at the end great for your final decision process. For me, size and an auto cutter were the main features I was looking for, and that eventually lead me to this device, the littlereviewed 18R. This particular unit is 23 times smaller in volume than all its brothers nonintended pun here, thanks to its rechargeable battery. I was resisting this rechargeable business at first, because it implies frequent use like a cell phone or laptop, but I warmed up to it.

I especially like the fact that this unit stores extremely well in addition to it being small unlike the desktop models which sit flat on your desk and awkwardly occupy a lot of space no matter where you place them, this one actually goes into your library like a book, or upright into a corner of your desk drawer or file folder. The auto cutter lives up to its name, so much better than manual. Here, you essentially delay your latest print in favor of a more efficient use of tape material. This should address most peoples issues with the wasted tape; its as good as it gets with this system. The device is very easy to use while you type your text, it tells you how long your label is going to be. If you select borders, etc. But I can live with it. My minor gripe with this device is the lowcontrast, nonbacklit display hey, since Im running on rechargeables, I could justify the energy needs of a backlight. Also, the latch that closes the cassette department doesnt seem solid to me a tiny plastic thing, similar to the one that broke on my other labeler. While Im whining, Id also like 360 dpi resolution for that really industrial look, but those printers are currently much more expensive or PC only, which to me is now useless. Still, this is the most useful, feature rich, and compact labeler that Ive ever used, so 4 stars are deserved. Hope it helped in your quest to label those sock drawersTape is not cheap. That said the labels are very high quality. I have not worked with this enough to see how good the battery life iswith NiMh so I only expect soso performance. It will be fine for me. LED is pretty poor but usable. Finally, the printer goes offline quickly and I have to remember to turn it on even though it is in the charging station. I have not yet found out how to change this, but it is a minor annoyance since it turns on quickly. You can use the keyboard on the machine. Or usb with your PC. There are a myriad of colour tapes thru the brother website.

Why am I replacing it. A sadly I dropped my old one. Sorry, we failed to record your vote. Brother PT18R Printer Review Expert review of the Brother PT18R printer Our Verdict This rechargeable desktop label maker can double as a handheld and portable labeller, making it one of the most versatile label printers around. The Brother PT18R labelling machine is designed with easyswap tape cassettes, onetouch operational keys, and PC connectivity, and it can print bar codes with ease.

However, it lacks a handle and support for multiblocking. Design The maximum print resolution is 180dpi and the print speed is up to 10mm per second. There's a USB port on the PTouch 18R printer for plug and play convenience. The Brother PTouch PT18R professional labelling machine can print in four different font types and in eight styles. A rechargeable battery makes the Brother PT18R rechargeable label maker environmentally friendly to use in the long run because it reduces the amount of toxic waste. Labels can be previewed from the high visibility LCD screen. The PTouch 18R rechargeable machine has an automatic tape cutter and onekey access for symbols and templates. There's no need to install software to make the PT18R label maker print from the PC. Data cannot be downloaded into the rechargeable label maker PT18R.
