bsr ppc3 manual

Product information Connect to the car. How to install PPC Sync 3 Synchronizing PPC Read data from car Support. BSR ppc software is calibrated for stock valves only. Click on the PPC Sync 3 link to start the installation. This handheld computing device can be plugged in directly to your car's diagnostic port. With a few simple clicks, and in just a few minutes, your car is tuned. You can restore your car's original settings just as quickly. This is a very economical option if you, for example, sell your car and want your new car tuned. You make the transfer yourself, quickly and easily, directly on our homepage via your own login site. As soon as the transfer is complete, the support for your old car is canceled. PPC3 er et 100% gjor det selv produkt. Med PPC 3 kan du tune bilen uten a apne panseret. Plugg PPC 3 i bilens diagnosekontakt og trykk pa knappen. Pa bare fa minutter er bilen tunet. Like raskt kan du programmere bilen tilbake til original. Nye PPC 3 er gjennomfort i sitt design med fargeskjerm og et slim utseende. Brukergrensesnittet er forbedret med pedagogiske menyer som har støtte for ulike sprak. Under programmeringen vises forklarende tekst beskjeder for a gjore alt enklere. En indikator viser, bade i prosent og tid, hvor langt programmeringen er kommet. Hardwaren i nye PPC 3 er kraftigere noe som muliggjør en raskere programmering av mange bilmodeller. Dataoverforingen mellom PPC 3 og BSR's server via Internet gar na raskere, og handteres med det nye programmet PPC Sync 3. Med dette programmet kan du laste ned seneste tuningprogrammet til Din bil, noe som er meget praktisk om du for eksempel leverer bilen til merkeverksted og de oppdaterer med seneste originale programvaren. PPC3 menyprak fas pa Norsk, Svensk, Engelsk og Tjekkisk Klikk her for a lese bruksanvisninger. <http://zavala.com.br/UserFiles/dav-dz120-manual.xml>

TRouble-FREE  RECOrd CHANGER

INSTRUCTIONS

IMPORTANT • Lift tone arm carefully from support post before first play; push it firmly down over post before transporting • Turntable must operate in level position.

AUTOMATIC OPERATION

1. **TO LOAD:** Raise control arm fully, from rear, and swing to right. Stack up to six records, place control arm on stack.
2. **TO SELECT SPEEDS:** Set lever at left to correct speed—16, 32, 45 or 78 rpm.
3. **TO SELECT STYLUS:** Turn stylus selector to LP for all records except 78 rpm.
4. **TO START:** Move right lever fully to REJ; hold, then release as turntable starts.
5. **TO REJECT RECORD:** Move the starting lever to REJ and release.

MANUAL OPERATION

Lift control arm fully, swing to right. Place record on turntable, return arm to left. Select speed and stylus, move starting lever to **MANUAL**, place stylus in groove. Shut-off is automatic.

SUGGESTIONS

If tone arm stays on rest as record turns, push starting lever fully to REJ. If lever is turned to OFF during changing cycle, control arm will lock; release by rotating turntable clockwise by hand.

EASY TO ADJUST (See illustration above)

This changer has been accurately pre-adjusted for correct stylus setdown, stylus pressure and tone arm height. If new adjustments should ever be needed, make them with a 12" record; then position will be correct for all sizes.

STYLUS SETDOWN: Adjust with setdown screw to start 1/8" from record edge. **STYLUS PRESSURE:** Lengthen or shorten balance spring position in spring anchor. **TONE ARM HEIGHT:** To raise, hold plastic nut firmly and turn screw head by hand counter clockwise; to lower, turn screw head clockwise. Adjust stylus to clear a full stack of records by 1/4". **TO REMOVE TURNTABLE:** Remove C-clip, lift carefully.

Use flat BSR UA50 adaptor spindle to play 45 rpm records.

KEEP THIS INSTRUCTION DISC FOR REFERENCE

moms. <http://www.alcantaracosmetica.com/images/editor/dav-dz151kb-manual-en-espa-ol.xml>

BSR**SERVICE
MANUAL****C 141 R1****GENERAL INFORMATION**

The BSR Model C141 R1 record changer will play a stack of one to six records in automatic sequences and shut off after playing the last record. 33 $\frac{1}{3}$, 45 and 78 rpm records can be played.

Playing, correct tone arm set-down, for playing 12", 10" or 7" records is determined by the position of the size selector control knob.

The tripping method is the velocity type. Rapid tone arm acceleration is required to actuate the trip mechanism.

The changer operates on 117 VAC 50 Hz.

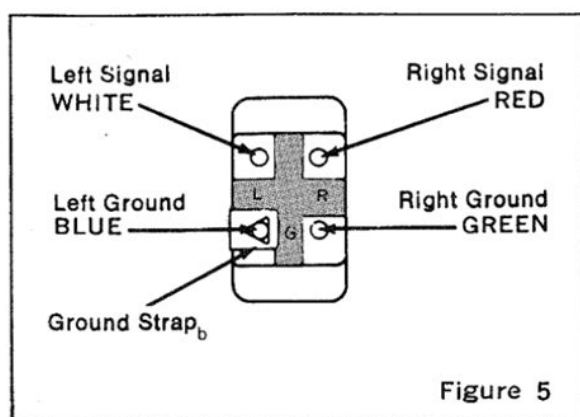

BSR (USA) LIMITED

ROUTE 303, BLAUVELT, NEW YORK 10913

Fordelen ved at du kober PPCen, er trygheden ved at du altid kan ga tilbage til bilens originalindstillinger samt at du kan holde dig opdateret med den seneste software. Derudover kan du altid lgge tuningssoftwaren pa bilen igen, hvis dit vrksted har lagt ny software pa bilen og dermed overskrevet tuningssoftwaren. To download the proper driver you should find the your device name and click the download link. Please click here to download. Glom INTE att skriva vad det galler for bil, arsmoell samt motorbeteckning! Jag har en S80 2.4t som gar som en pase notter och ar forsatt i konstant limp mode. Dock forsvinner det ibland och den gar som vanligt. Min Kinalasare ger felkoden p0121. Jag rengjorde spjallet till ingen nytta. Bilen har gatt nastan 27000 mil. Bilen fick ett nytt spjall vid 12000, med vit lapp. Vannen i fraga havdar att det inte alls gar att lasa ut felkoder med hans PPC. Utan den kan enbart anvandas till att trimma hans XC90 D5. Radera vet jag a andra sidan att man kan gora, for det gjorde jag med hjalp av hans PPC for att fa bort airbaglampan efter att jag tog bort klimatkontrollen med batteriet pakopplat. Sa till min fraga, kan man lasa ut felkoder med en BSR PPC 2 Isf hur Manualen pa natet hittade jag inget i. Tack pa forhand! Traden far garna flyttas om den ar i fel forumdel. Toppen! Ser man koden direkt pa displayen Aven du som redan har kopt en PPC 3 effektoptimering till din bil, kan enkelt kopa till och ladda ner felkodslasaren i efterhand via var hemsida. Felkodslasaren fungerar bara till din bil. Hanterar alla styrenheter i bilen I en modern bil finns det ett flertal olika styrenheter som kontrollerar alltifran motor, transmission,

ABS, airbag, radio, luftkonditionering och mycket mer.

<http://condit-pack.com/images/bosch-owners-manual.pdf>

Till skillnad från de felkodsläsare som är vanligt förekommande på marknaden kan PPC 3 kommunicera med samtliga styrenheter i bilen. Felkoderna presenteras med felkodsnummer enligt standard tillsammans med en beskrivande text som förklarar vad felkoderna betyder. När du kopplar in PPC 3 i bilens diagnosuttag så kommer du, förutom att kunna trimma bilen, att kunna läsa och radera felkoder via displayen på PPC 3. Felkoderna kan sedan enkelt föras över från PPC 3-enheten till din egen inloggningssida på. Där sparas hela din felkodshistorik. Felkodsläsaren är inkluderad i vissa trimsatser till Volvo utan extra kostnad fr.o.m 2010.05.01. Till övriga PPC 3 trimsatser kan den kopas till för endast 495kr inkl moms. Om du redan har PPC 3 till din bil kan du köpa till felkodsläsaren från denna sida logga in med ditt PPC-nummer och lösenord. Om du ska köpa PPC 3 så kan du lägga till felkodsläsaren genom att välja den som tillval i trimsatsen för respektive bilmodell när du beställer PPC 3. Måste inte det betyda att han har felkodsläsare i PPCn. Unlike the many ordinary code readers available on the market, the PPC 3 Diagnostic System is capable of communicating with all control units in the car. All diagnostic trouble codes are displayed with a DTC number, according to standard, together with text messages explaining what the codes mean. If necessary, the diagnostic trouble codes can also be erased. Read all DTCs Erase all DTCs Reset service indicator lamp. Handles all control units. DTC history from each car can be saved on your own customer site. When connecting the PPC 3 Diagnostic System to your car, you will be able to read and erase diagnostic trouble codes via the display of the PPC unit. Every car that you have read diagnostic trouble codes from will be saved so that you can access it later if you want to. This product works with these car models All Volvo cars from 2001 and forward. By using our website you agree to our use of cookies in accordance with our cookie policy. BSR Stage E85 software makes it possible to run on either petrol or E85 at any proportion, the software adjusts itself to the mix that is in the tank. Power and torque are the same for petrol and E85. The advantage of buying your own PPC device is that you have the assurance that you can always reset to the original settings, and that you will always be updated with the latest software. If your service station sets your car back to the original settings, you can simply load the tuning kit again. Those of you who already own a PPC 3 device can transfer it over to another car, and only pay for the software of the new tuning kit. This is a very economical option if you, for example, sell your car and want your new car tuned. As soon as the transfer is complete, the support for your old car is canceled. The updates come out when, for example, an automobile manufacturer modifies the original software, or makes general improvements. You will be notified by email. After this you synchronize your PPC unit with PPC sync to download the software and then program it to your car. Download PPC Sync here This handheld computing device is plugged directly in to your car's diagnostic port. You can restore your car's original settings just as easy. This PPC must then be returned to BSR in best condition within 14 days. Freight costs and the BSR Tuning Warranty are not included in the price. This is a very economical option if you, for example, sell your car and want your new car tuned. As soon as the transfer is complete, the support for your old car is canceled. Choose option below Also return the However, if. You must have JavaScript enabled in your browser to fully utilise the functionality of this website. amounts may be slightly out of date. See each listing for international postage options and costs. Any tips or pros and cons. I checked out Map Tun website but they dont have the sw for the NG 95s. Other than price. I also have a SAAB 95 NG 95 Aero V6 and have recently received the BSR PPC3 unit with stage 1 loaded and ready unfortunately it will not recognise my current software, so I am presuming that my car was never uploaded with the software upgrade for this car, which I think was introduced a couple of years or so after the car was released. I will have to take the car to a SAAB specialist and get the software verified and updated before I can proceed. With regards to Maptun vs. BSR for the SAAB 95 NG Aero V6 they have similar HP increase, Maptun ever so slightly higher but pretty insignificant Maptun 330HP vs BSR 325HP the real gain is the Torque, BSR gives far greater Torque increase Maptun 470NM vs. BSR 513NM and in my opinion is the way to go to get the best out of the car. Im interested in the steps required connect to website download sw.

<http://test.uebersetzungen-nesselberger.de/wp-content/plugins/formcraft/file-upload/server/content/files/1626c04d4e811b---candy-microwave-manual.pdf>

Looking at the maptun videos their product is pretty much plug and play within 10 mins. As for the firmware update here is the link at saabcentral on the DIY way using a flash drive. I havent tried it yet, but if I go to the BSR route I will have to do it sooner than later. I have had the 95 v6 only 3 weeks so just getting into customizing it. This is a DIY download of 3 files onto a flash drive that updates the 1011 NG 95 firmware. I, too, will have to do this if I go the BSR route I have had my 95 V6 for only 3 weeks and have only just got to the customizing phase. With BSR, once you get your PPC3 unit, you need to download PPC3 Sync to a Computer or Laptop, they supply the download details they also supply a logon and password to use this. You then plug your PPC3 in to the Computer through a supplied USB lead press SYNC and it will load the SW ready for use through this PPC3 Sync. Plug the PPC3 in to the cars Diagnostic Connector usually down under from the steering wheel and slightly protruding, put the ignition to position 2 all electric on but engine off. Turn off everything, such as auto lights, audio system etc, and then off you go following the simple instructions on the PPC3. Once completed, disconnect and then reconnect back to your Computer and do a final sync through the PPC3 Sync facility. This then registers everything on the website, where you have all your details and history stored along with the warranty The whole process is very quick from start to finish in about 20 to 30 minutes. Any problems, you can just plug the PPC3 back to your car and it has the option to revert back to original SW which you can change back and reload again as many times as you want. Any SW changes or updates, BSR notify you and you update by following the whole process again, and this will ensure you always have the most updated SW available from them.

TBH, this works great in my older 93 Aero, but this NG 95 is a bit of an unknown so I am hoping it works just as well, which if it does then the extra Torque will just blow you away. If I can not resolve the ECU SW issues, then I will go to Maptun but my preference is BSR for the Torque. Thanks for the U803 details I will take a look, but not sure this will do it because it is an ECU SW download which is unlikely to work without using the Saab tech stuff that only specialist garages have. Thanks for the good insight into the BSR. Let us know when you get it installed. Simple enough for them to do, if they have the right equipment for the NG 95 many garages in the UK do not have the capability, they only have the older Tech2 equipment which does not fully work on our NG cars. To start viewing messages, Visit my VPCUK garage and my YouTube channel WobblyDave72 I have had BSR ppc on two of my cars now and the results have been nothing short of amazing. Currently running a stage 2 remap on my R with ppc and its perfect. Comes on and off the car when ever i want it to. Havent had any problems either. Polestar are the Volvo approved but thats only recently. It cant have been BSR that screwed your car up else it would screw mine and everyone elses up too, so you may have had a problem with your car that you werent aware of. You could of had a faulty ECU or something went wrong when loading the software that caused your issues. You cant just poo

poo something because of your own experience. People should ignore their own experiences because others say it is not so. Perhaps we should all eat 5h1t as millions of flies cant be wrong. Disclaimer I have no experience of BSR, just Rica, HLM and ARD. Also, you dont need to choose the sports map. The RICA upgrades for the Euro 4 D5 models start with a map that is the Polestar equivalent, which is the mildest option and is much better value than the Polestar upgrade.

People should ignore their own experiences because others say it is not so Not stirring just concious that there are not many mapped D5 owners on VPC or perhaps I ignore their posts!. Enjoying the comfort and relative economy. People should ignore their own experiences because others say it is not so. Disclaimer I have no experience of BSR, just Rica, HLM and ARD. That person may have other reasons why a product doesnt perform aswell that they are unaware of and i can think of one very recent perfect example of that happening. I wont name names as they are a forum member and i dont want to use them as an example. It is very easy to shun a product when its not the product that is at fault and if the same product was put on a different vehicle, then the result would be completely different. If 99 people say something is crap and 1 says its not, then clearly the product IS crap. Im not saying we should ignore other peoples experiences, just that we should not read into them so much and take it at face value and with a very broad open mind. I have a stage 2 BSR map and it works totally sweet on my car. Exactly what should the Throttle pos., ETM and Turbo DC be when you start to build boost. Are you saying that you have 15% Throttle position and ETM was reading 100%. Maybe something is wrong with your car. What should it be then. What are the readings with an OE map. I disagree that they are a waste of money too. My personal experience with BSR on two different cars has been excellent! Im just telling glynroberts what mine was like and I bet yours is if it is a stage three map as all I got from them when I complained was our maps are all the same on each stage with no complaints. But most people who go for a remap think wow when when they come away with both wheels spinning with the slightest pedal movement. You must have JavaScript enabled in your browser to fully utilise the functionality of this website.

Gan prieksejais, gan aizmugurejais gals ir pilnigi jauns. Gone ir veca Ford balstita cuguna un viegla terauda apturesana, kas ari ir jutiga pret griezes momentu. Jauna priekseja ass ir konstrueta ar dubultas skerssviteju aluminiija sliktu realu coiloveru. Aiz stikla skiedras sez krustam atspere piemeram, Chevrolet Corvette. It ipasi cetru ritenu piedzina uzskata, ka ir patiesam jauks brauciens, no sturciem un apalajiem celiem tas gandriz lidzinas brauksanai ar aizmugurejo ritenu piedzinu, jo tas atrodas uz aizmugurejiem riteniem un paatrina. Ar so jaudigo jaudas palielinajumu automasina iegust sniegumu, ko tas ir pelnijis! Prieksrociba, perkot savu PPC ierici, ir ta, ka jums ir parlieciba, ka jus vienmer varat atiestatit sakotnejos iestatijumus un ka jus vienmer atjauninasiet uz jaunako programmaturu. Ja jusu serviss attiestata jusu automasinu sakotnejos iestatijumos, jus varat vienkarsi ieladet tuning komplektu velreiz.

Tie, kuriem jau pieder PPC 3 ierice, var to parladet uz citu automasinu un maksat tikai par jauna tuninga komplekta programmaturu. Tas ir loti ekonomisks risinajums, ja jus, piemeram, pardodat savu automasinu un velaties, lai jauna automasina tiktu noreguleta. Jus pats parnesat informaciju, atri un vienkarsi, tiesi musu majas lapa, izmantojot savu lietotaja vardu. Tiklidz informacijas parnesana ir pabeigta, jusu vecas automasinas atbalsts tiek atcelts. Si ar roku parvaldama ierice ir tiesi pievienota jusu automasinas diagnostikas portam. Ar daziem vienkarsiem klikskiem, dazu minusu laika jusu automasina tiek noreguleta. Jus varat tik pat vienkarsi atjaunot savas automasinas sakotnejos iestatijumus. Pec tam, 14 dienu laika, PPC jaatdod vislabakaja stavokli BSR. Kravu izmaksas un BSR Tuninga Garantija nav ieklauta cena. Tas ir loti ekonomisks risinajums, ja jus, piemeram, pardodat savu automasinu un velaties, lai jauna automasina tiktu noreguleta. Jus veicat

parnesanu pats, atri un vienkarsi, tiesi musu majas lapa, izmantojot savu pieslegsanas vietni. Tiklidz parnesana ir pabeigta, tiek atcelts jusu vecas automasinas atbalsts. Izvelieties talak noradito iespeju
